I build fast. With an AI-powered workflow, I deliver beautiful frontend experiences alongside a performant backend. Check out my CRM + ERP + AI agent project for an example: GerentIA (gerent.app). Or my personal portfolio and blog for more: neofanaro.io. 3+ years of professional experience, with a primary stack of **Next.js**, **React**, **TypeScript**. As well as extensive experience in **Python**, **Flutter**, **SQL**, **NoSQL**, and **Firestore**. Other technologies I'm also proficient in would be: **React Native**, **AWS**, **Lit**, **Three.js**, and **Java**.
