

PHILIPPE FANARO

SOFTWARE ENGINEER

NEXT.JS & REACT.JS SPECIALIST | TYPESCRIPT & AI

1 Summary

I build fast. With an AI-powered workflow, I deliver beautiful frontend experiences alongside a performant backend. Check out my CRM + ERP + AI agent project for an example: GerentIA (gerent.app). Or my personal portfolio and blog for more: neofanaro.io.

Software Engineer with **3+ years** of experience building full-stack, cloud-native, and distributed software systems across the complete software development lifecycle. I design and deliver scalable SaaS platforms, APIs, and high-performance web applications using **Next.js**, **TypeScript**, **React.js** and Cloud Services, combining frontend architecture expertise with backend engineering, cloud infrastructure, data modeling, and system design to build reliable, maintainable, and production-grade products.

Besides Next.js and React.js, I have experience working with **Flutter** and **Dart**, having built a popular open source data structures package (200+ Stars on Github). And I have also built frontend products in the insurance sector, consisting of Web Components which integrated seamlessly with third-party platforms. I also bring a **data science** background, having built ML models and data pipelines with Python, pandas, scikit-learn, and SQL. I am a programmer-writer as well, having written two books using **L^AT_EX**, while at the same time using that same programming language to create scalable vector diagrams.

2 Work Experience

1. Programmer and Writer (*Sep 2024 – Dec 2024*)

- Designed an open-source L^AT_EX package for generating vector Go (Baduk/Weiqi) board diagrams, and used it to author and typeset a 400-page technical book, “*Técnicas de Go*.”
- Managed the full project lifecycle independently and published under an open-source license on GitHub (20+ Stars): github.com/psygo/tecnicas_de_go

2. Full Stack Developer @ Vertical Insure, Inc. (*Feb 2023 – Jun 2023*) – United States (*Remote*)

- Built reusable UI components and responsive web applications with React, Lit Framework, and TypeScript.
- Developed backend APIs with Java, Micronaut, Node.js, and Express, integrating with external insurance-sector platforms.
- Managed cloud deployment and observability using AWS, Render, and Datadog.

3. Open Source Software Developer – Dart / Flutter @ Freelance (*Sep 2020 – Jan 2021*) – Online

- Co-developed Fast Immutable Collections (FIC), a high-performance immutable data structures package for Dart/Flutter:
github.com/marccglasberg/fast_immutable_collections

- Designed immutable lists, sets, maps, and multimaps with custom comparators and extension methods, applying Test-Driven Development throughout.
4. **Data Scientist @ Zanthus** (*Feb 2019 – Oct 2019*) – *Greater São Paulo Area*
 - Built a Customer Lifetime Value (CLV) model to support retail marketing, retention, and segmentation decisions.
 - Owned the full data pipeline: SQL extraction, preprocessing with pandas/NumPy, modeling with scikit-learn, and a Django REST API serving predictions.
 5. **Intern @ Vital Care App** (*Sep 2016 – Dec 2016*) – *Greater São Paulo Area*
 - Improved customer service, digital marketing, and SEO strategies, and proposed UI/UX enhancements to the mobile app.
 - Investigated regulatory compliance issues with partner pharmacies to help protect marketplace quality.

3 Education

1. **Telecommunications Engineer, Electrical Engineering (BSc) @ Universidade de São Paulo (USP)** (*2011 – 2016*)
 - The best university in South America.
 - Specializing in telecommunications.
 - (Engineering degrees take 5 years in Brazil.)
2. **International Engineering Exchange, Electrical Engineering @ Université Libre de Bruxelles (ULB)** (*2015 – 2016*)
 - One year abroad in Brussels, Belgium, studying engineering, through a government scholarship.
 - Perfected my English
 - Learned French.

4 Projects

- **GerentIA** (*Aug 2026 – Today*)
 - CRM + ERP, through AI agent integration.
 - Built with React Native, Next.js, and AI.
- **Lang101** (*Jun 2026 – Today*)
 - A language learning app based on flashcards and Elo.
 - Built with React Native and AI.
- **neofanaro.io** (*Jun 2026 – Today*)
 - My personal portfolio and blog, built with Next.js and TailwindCSS.
 - The new version of my old, basic blog, fanaro.io.
 - Live: neofanaroio.vercel.app
- **Magi** (*Sep 2025 – Dec 2025*)
 - A 2D exploration of the internet, using SQL and Excalidraw to create a graph database.
 - github.com/psygo/magi
 - Live: magi.vercel.app
- **Aquarifolio** (*Sep 2025 – Dec 2025*)
 - Interactive 3D portfolio built with React and Three.js showcasing software engineering projects.
 - github.com/psygo/aquarifolio
 - Live: aquarifolio.vercel.app
- **Técnicas de Go (Go Board Game Techniques Book)** (*Sep 2024 – Nov 2024*)
 - A book on Go (board game), entirely made with L^AT_EX, and a custom package for drawing vector diagrams with TikZ/PGF.
 - github.com/psygo/tecnicas_de_go

- **YouTube KBD Nav** (*Sep 2021 – Oct 2021*)
 - A browser extension for navigating YouTube solely through the keyboard.
 - github.com/psygo/youtube_kbd_nav

5 Certifications

- TOEFL iBT 103/120 (C2 Proficient)
- EF SET English Certificate 76/100 (C2 Proficient)
- Deep Learning Specialization
- Data Science Forum Participant

7 Competencies

Frontend Development • Backend Development • REST APIs • Cloud Deployment • Data Analysis • Machine Learning • UI Design and Development • SQL Database Design • Agile Development • Test-Driven Development • Code Reviewing

8 Technical Skills

Top Skills (LinkedIn): English • Writing • Artificial Intelligence (AI)

Main Stack: React • Next.js • TypeScript • SQL • Tailwind CSS • HTML • CSS

Other technologies I have worked with: Flutter/Dart • Web Components • Lit • Three.js • React Native • Firebase • $\text{\LaTeX}$

Data Science/Analytics stack: Python • SQL • Pandas • NumPy • Scikit-learn • Django

Other technologies I use or have used: Java • Shell • Vim • TikZ/PGF • Git • Github • Docker • REST APIs • JSON • Linux • AWS

9 Languages

Language	Proficiency
Portuguese	Native or Bilingual
English	Native or Bilingual
French	Advanced
Spanish	Intermediate
Korean	Basic
Japanese	Basic

6 Publications

- **Técnicas de Go** – A 400-page technical book on Go (Baduk/Weiqi), written and typeset entirely in $\text{\LaTeX}$.
- **Tradução de Livro de Go** – Official translation and editing of an introductory book on Go, from English to Portuguese.

10 Personal Information

Location	São Paulo, Brazil
Phone	+55 (11) 97028-6739
Email	philippefanaro@gmail.com
Blog	neofanaro.io
LinkedIn	linkedin.com/in/philippe-fanaro
GitHub	github.com/psygo
